The **Active** and **Active Mature** products listed below are unaffected by the Microsoft DCOM Hardening patch:

Unaffected Products		
<ul style="list-style-type: none"> <li>• FactoryTalk® Activation Manager</li> <li>• FactoryTalk® Updater</li> <li>• Studio 5000® Add On Profiles</li> </ul>	<ul style="list-style-type: none"> <li>• PanelView™Plus 6 / 7</li> <li>• PlantPAx® MPC</li> <li>• PlantPAx® Process Object Online Configuration Tool</li> </ul>	<ul style="list-style-type: none"> <li>• Connected Components Workbench™</li> <li>• FactoryTalk® Historian ME</li> </ul>

The following products' lifecycle state is **End of Life** or **Discontinued**. No action is planned to address the Microsoft DCOM Hardening patch, regardless of the effect on the product, based on the lifecycle state:

End of Life or Discontinued Products		
<ul style="list-style-type: none"> <li>• FactoryTalk® Performance Management</li> </ul>	<ul style="list-style-type: none"> <li>• RSView®32 (Active Display)</li> </ul>	<ul style="list-style-type: none"> <li>• GuardPLC™ OPC Server</li> </ul>

Rockwell Automation products may be **directly** or **indirectly** affected by Microsoft's patch. For example,

- ThinManager® is **directly** affected because it uses DCOM between the ThinManager® UI and a remote ThinServer™ service
- FactoryTalk® Edge Gateway™ is **directly** affected because it offers an OPC-DA ingress point that uses DCOM to establish connection
- Studio 5000 Logix Designer® is **indirectly** affected because it uses FactoryTalk® Services, specifically FactoryTalk® Security, and FactoryTalk® Services uses DCOM between the FactoryTalk® Directory server and FactoryTalk® Directory client
- FactoryTalk® Product Management is **indirectly** affected because it uses FactoryTalk® ProductionCentre®, and FactoryTalk® ProductionCentre® uses FactoryTalk® Services and FactoryTalk® Live Data
