

# 8-HOUR ARC FLASH TRAINING

**COURSE #: ARC8**

## COURSE PURPOSE

Electrical injuries are the fourth leading cause of work-related deaths in the U.S., and they are most common in the construction industry. This course will cover the dangers of arc flash and the National Electrical Code (NEC) regulations regarding arc flash safety. Students will understand arc flash PPE and warning sign requirements and will be able to perform an Arc Flash Hazard Analysis.

## WHO SHOULD ATTEND

Electricians and electrical engineers who work with electrical equipment or work somewhere where arc flash is possible should take this course.

## PREREQUISITES

None

## STUDENT MATERIALS

No additional materials are required.

## COURSE AGENDA (ONE DAY)

- Identifying and understanding NEC and OSHA regulations about arc flash hazards and safety
- Reviewing arc flash risk assessment procedures
- Identifying effects of arc flash on the human body
- Identifying steps and risks of creating an electrically safe work condition
- Reviewing lockout/tagout procedures
- Understanding hazards related to arc flash
- Identifying the information required for an Arc Flash Hazard Analysis
- Understanding arc flash PPE requirements
